5-17

A hand-drawn schematic diagram of a circuit. The diagram features several components and connections:

- 18**: A coil or inductor symbol on the left side.
- 21**: A rectangular component, possibly a relay or switch, at the top center.
- 24**: A diamond-shaped component, likely a diode, on the right side.
- 30**: A dashed line indicating a boundary or enclosure.
- 39**: A circular component, possibly a capacitor or a small transformer, at the bottom center.
- 41**: A line pointing to a junction or connection point.
- 43**: A line pointing to a component at the bottom, possibly a diode or a small transformer.
- 45**: A line pointing to a junction or connection point.
- 70**, **73**, **74**, **75**, **76**, **77**, **78**: Various points, lines, and components within the central part of the circuit, including a coil-like structure labeled **75**.

The diagram shows a complex arrangement of these components connected by lines, with a dashed line **30** defining a specific area of the circuit.
